MathVantage Online Courses Availability

MathVantage Corp. is diligently working to launch its online courses as soon as possible. Professor Patrick Chevalier will elucidate all mathematical concepts and provide solutions to all examples and exercises in each textbook, requiring over five thousand photographs and videos.

The material is self-explanatory; however, MathVantage encourages its students to discuss the content with friends, family, and educators. This collection presents an exceptional and affordable opportunity to establish a strong foundation in mathematics within a brief period. (On average, each lesson or exam requires only 1 to 2 hours for completion.)

MathVantage is currently assessing the availability of each online course. The company reserves the right to alter the sequence in which the online courses are prepared and assumes no responsibility for any delays.

The updated online course availability are:

Book 1: Algebra I (Available in January of 2025)
Book 0: Arithmetic (Available in March of 2025)
Book 4: Plane Geometry (Available in May of 2025)
Book 3: Trigonometry (Available in July of 2025
Book 2: Algebra II (Available in September of 2025)
Book 5: Solid Geometry (Available in November of 2025)
Book 6: Analytic Geometry (Available in January of 2026)
Book 10: Math - SSAT/ACT - College Prospective (Available in March of 2027)
Book 7: Calculus - Limits (Available in May of 2027)
Book 8: Calculus - Derivatives (Available in July of 2027)
Book 9: Calculus - Integrals (Available in September of 2027)
Book 11: Statistics and Probability (Available in November of 2027).

PS1: MathVantage Corp. is doing its best to release its online courses as soon as possible.

PS2: You can email MathVantage Corp. at mathvantageschool@gmail.com with the subject: Change Order of the Courses Availability to suggest which Online Course (book) needs to be made first.
